

## LTL Batch Rater

### Frequently Asked Questions

Q1: What LTL carriers are integrated in this tool?

A1: ProTrans (PNII) and Central Transport (CTII)

Q2: Can I rate Canada or Mexico locations?

A2: No. Only US to US.

Q3: What should I put in the "carrier\_scac" field of the import template?

A3: To get a Central Transport LTL rate enter "CTII" (without quotes), to retrieve a ProTrans rate enter "PNII"

Q4: Is fuel cost included in the returned rates?

A4: No.

Q5: Are accessorial costs included in the returned rates?

A5: No.

Q6: How do I match the results returned from the batch rater back to my input file?

A6: Use descriptive, unique IDs in the "shipmentID" field. The batch results will include the "shipmentID" fields so you can link the results back to your inputs.

Q7: How can I find costs for other Freight Classes (FAK) besides 70?

A7: Right now you can't. All Delphi contracted LTL rates are pegged at FAK 70.

Q8: Why can't I get a LTL rate for shipments over 15,000 pounds?

A8: Shipments over 15k lbs. are most cost effective going Full Truckload and shouldn't be sent LTL.

Q9: Does it matter what filename I give my import template?

A9: No.

Q10: Does it matter the file type of my import template?

A10: Yes. Your import template should be in CSV (comma-separated-value) format.
